A Campbell Brothers Limited Business

As the leading Australian-based supplier of cleaning technologies to the Dairy Industry, we remain committed to the provision of world class plant hygiene systems.

The Cleantec support philosophy provides technology, people and systems to consistently deliver effective and efficient cleaning and sanitation systems. Our technical skill base includes dairy specialists, formulation chemists and applications engineers who are constantly kept up to date with the latest developments in dairy plant sanitation techniques. Because each dairy plant is unique, we develop a close working knowledge of your operation, enabling a proactive approach to your current and potential needs. This includes dependable service, on-call assistance and customised training to ensure optimal system function and employee safety.

Our commitment is simple .....  
**Total Customer Satisfaction**

# Cleaning Solutions

## for the dairy industry

### NEUTRAL RINSE AID

#### Dairy Power Assist

##### Low foaming pre-cleaning additive

Low foam wetting agent which softens and breaks up milk deposits in the post milking rinse step preventing milkstone formation during the hot wash. Particularly desirable for use in low line plants, large bore milk lines and where water quality or hardness is extreme.

20 litre drum P/C 14772  
 110 litre drum P/C 6797110  
 APVMA (NRA) approval: 49184

### ALKALINE CLEANERS

#### Dairy Power Auto-Kleen

##### Heavy duty low foam alkaline cleaner

Low foaming heavy duty caustic based liquid circulation cleaner designed to remove most fat and proteinaceous soils. Suitable for use with most autowash units, vats and milking plants where liquids may be automatically dispensed.

20 litre drum P/C 7219020  
 110 litre drum P/C 7219110  
 200 litre drum P/C 7219200  
 APVMA (NRA) approval: 52224

#### Dairy Power Back-Up

##### Heavy duty low foam alkaline cleaner

Specifically formulated for stubborn soils. Low foaming blend of caustic, surfactants, sequestering agents and soil suspending agents quickly penetrate, remove and suspend organic soils from the milking plant. Suitable for use with most autowash units, vats and milking plants where liquids can be automatically dispensed for safety.

20 litre drum P/C 14968  
 200 litre drum P/C 6803200  
 APVMA (NRA) approval: 52224

### Dairy Power Clenex

#### General purpose low foam powder detergent

General purpose low foaming detergent suitable for cleaning most milking plants, vats and parts. Balanced formula and high levels of softening agent ensure excellent rinsability and enable it to be used in hard water conditions. Safe to use on all equipment. Helps prevent the formation of milkstone and scale deposits.

20 kg bag P/C 14594  
 APVMA (NRA) approval: 49185

### Dairy Power Inline

#### Heavy duty low foaming alkali cleaner

Formulated for use on farms for cleaning milking equipment and in dairy processing for the cleaning of cream pasteurisers, plate heat exchangers, silos, vats, chillers and road tankers. Inline is suitable for use in recirculating systems and is effective in hard water conditions.

20 kg pail P/C 16290  
 20 kg bag P/C 16288  
 APVMA (NRA) approval: 49191

### ACID CLEANERS

#### Dairy Power CB Acid

##### Heavy duty acid

Highly concentrated liquid acid cleaner formulated from a blend of phosphoric acid, wetting agents and corrosion inhibitors. Effective in the removal of baked on milk stone and hard water deposits. Low foaming formula makes it suitable for use in all milking plants and vats as well as in autowash units where liquids are preferred.

10 litre drum P/C 19285  
 20 litre drum P/C 16632  
 110 litre drum P/C 6809110  
 APVMA (NRA) approval: 49189

### CLEANER/SANITISERS

#### Dairy Power Eze-Fome

##### High foam alkaline detergent

Chlorinated high foaming alkaline liquid cleaner. Can be used for manual cleaning, parts washing and can also be foamed onto surfaces using a hydrofoamer. Particularly suited for the removal of fatty and proteinaceous soils from milkvats, bails and receipt cans.

10 litre drum P/C 6818010  
 APVMA (NRA) approval: 49182

#### Dairy Power Flexi-Temp

##### Acid dairy detergent and sanitiser

Low foaming, acidic cleaner sanitiser for use in cleaning milking machines and vats in a one step operation. Contains a broad spectrum biocide. Low foaming in both hot and cold conditions.

20 litre drum P/C 17966  
 110 litre drum P/C 6863110  
 200 litre drum P/C 17968  
 APVMA (NRA) approval: 51288

#### Dairy Power Impact

##### Chlorinated caustic bomb

Low foaming chlorinated caustic detergent powder formulated for use as a weekly or remedial bomb cleaner. Very effective in removing stubborn proteinaceous and heavy soil build-ups in dairy plants.

10 kg pail P/C 17242  
 20 kg pail P/C 6827020  
 APVMA (NRA) approval: 49181

#### Dairy Power Komplexe

##### Low foam acid cleaner sanitiser

Acidic low foaming iodine based detergent sanitiser that is formulated to clean and sanitise in one step. Particularly suitable for use in milking plants and vats where cold hard water is used.

20 litre drum P/C 27333  
 110 litre drum P/C 6833110  
 APVMA (NRA) approval: 49186

### SANITISERS

#### Dairy Power Biodyne

##### Low foaming high acid iodophor

Low foaming iodine sanitiser which kills bacteria quickly. Particularly effective where water quality is poor. Suitable for most milking plants, vats and for parts sanitising.

NRA approval 49187

20 litre drum P/C 23038  
 110 litre drum P/C 6806110  
 APVMA (NRA) approval: 49187

#### Dairy Power Defender

##### Low foam acid sanitiser

Low foam acid anionic sanitiser with high biocidal activity suitable for use in most milking plants and vats as a contact sanitiser and where auto vat and line wash units are installed. Can be used in hot or cold water.

20 litre drum P/C 15354  
 110 litre drum P/C 6815110  
 200 litre drum P/C 6815200

APVMA (NRA) approval: 49190

### TEAT CARE

#### Dairy Power Glysoft

##### Udder emollient

Dairy Power Glysoft is an emollient containing sorbitol, lanolin and glycerine. When added to an iodine teat dip or spray it enhances teat skin condition particularly in winter.

20 litre drum P/C 6821020  
 200 litre drum P/C 6821200  
 APVMA (NRA) approval: 56788

#### Dairy Power Teat Care

##### Antiseptic teat ointment

Formulated with chlorhexidine and cetrimide to help prevent mastitis and emollients including glycerol (30g/L) to soften and restore the skin condition.

4 x 1 litre carton P/C 17156  
 APVMA (NRA) approval: 47669

### Dairy Power Masidyne

#### Iodophor teat sanitiser

Medicated formulation containing glycerine (46g/L) and lanolin (16 g/L). Can be used as a teat dip or spray. Iodine aids in the control of mastitis while the glycerine and lanolin keep the teats in good condition.

20 litre drum P/C 7154020  
 60 litre drum P/C 7154060  
 110 litre drum P/C 7154110  
 200 litre drum P/C 7154200  
 APVMA (NRA) approval: 49122

### Dairy Power Maspray

#### Disinfectant teat dip and spray

Chlorhexidine gluconate (55g/L) based teat disinfectant that aids in the control of mastitis causing organisms. Contains glycerol to help keep teats in good condition (445g/L active glycerol and 80g/L active glucose).

20 litre drum P/C 15034  
 110 litre drum P/C 6836110  
 APVMA (NRA) approval: 49123

### Dairy Power Ready-Dyne

#### Iodophor teat sanitiser

Ready Dyne is a ready to use iodine based pH adjusted teat dip and spray formulated for the control of mastitis. The product contains both lanolin and glycerine to help keep teats in good condition. The ideal product to use in areas where water quality is a problem.

200 litre drum P/C 7340200  
 100 litre IBC P/C 7340911  
 APVMA (NRA) approval: 56087
