

The Cleantec Difference

- ✓ **Customer Focus**
- ✓ **Technical expertise**
- ✓ **Highly qualified research and development team**
- ✓ **Innovative cleaning solutions**
- ✓ **Local knowledge**
- ✓ **Global transfer technology**
- ✓ **Turn key engineering projects**
- ✓ **Complete product range**
- ✓ **Superior products**
- ✓ **Professional reporting**
- ✓ **Total supply package**
- ✓ **Environmentally friendly operations**

Cleaning Solutions for the poultry industry

Cleantec

Cleantec is a part of Campbell Brothers Ltd, the well known Australian company established in 1863. Cleantec specialises in the supply of cleaning and hygiene chemicals and systems throughout Australia, New Zealand and Asia/Pacific.

Food Hygiene Systems

Cleantec Food Hygiene Systems manufactures a full range of cleaning, sanitising and disinfection chemicals for the Poultry Industry. These are available either directly from Cleantec or through our Australia wide network of distributors.

Cleantec has arguably the best qualified Research and Development team in the region. They have produced innovative solutions improving hygiene outcomes in many areas of the Food Processing Industry. Currently they are developing some new and exciting technology that will revolutionise areas of the poultry industry in the future. This new technology will bring significant benefits to Cleantec's customers.

Cleantec's highly qualified team of Industry Specialists and Technical Representatives provide customers with a level of service that exceeds expectations whether it be working with customers to ensure a clean site or assist them in meeting compliance standards.

Chemical Systems Engineering

Chemical Systems Engineering is an integral part of Cleantec's approach to satisfy all hygiene and sanitation requirements by ensuring total supply of all chemicals and their dispensing systems. Key equipment for the Poultry Industry includes:

- Chemical storage, handling and distribution systems
- Chemical dosing systems
- Foaming equipment
- CIP systems
- Sodium Hypochlorite dispensing systems
- Chlorine Dioxide dispensing systems
- Medium pressure cleaning systems

Water Treatment

Cleantec Water Treatment provides a quality Total Water Management service that specialises in a total site approach to manage and optimise all aspects of a site's water handling systems. Of particular importance to the Poultry Industry is their expertise in water clarification and effluent control.

Products Cleaners

Neutrafoam

Neutrafoam is a non caustic general purpose detergent which is safe to use on all surfaces. An effective vehicle wash.

Dex

Neutral, instantly soluble detergent cleaner effective in water of any hardness.

Cleaner Sanitisers

Maxifoam

Maxifoam is a liquid heavy duty alkali foam cleaner. A powerful blend of caustic, chlorine, sequestrants, a corrosion inhibitor and high foam surfactants. Safe on mild steel and aluminium.

Profoam

Concentrated acidic detergent/sanitiser. One step phosphoric acid based liquid with built in foam for use through a foaming unit. Can be used as a manual acid descaler.

Quatrasan

Quatrasan is a highly concentrated sanitiser/detergent that combines quaternary ammonium biocides with powerful detergents. Can be used as a one step cleaner and sanitiser.

Sanitisers

Kwiksan 22

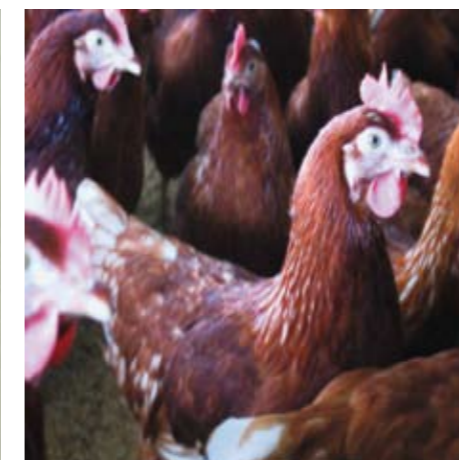

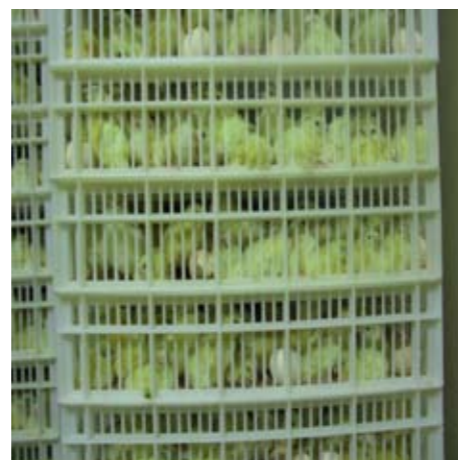

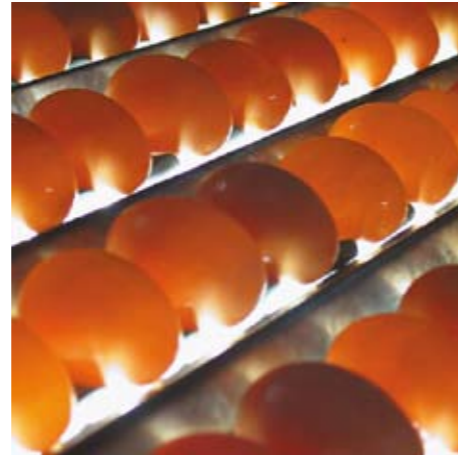

Concentrated quaternary ammonium sanitiser formulated to sanitise surfaces in all food processing areas where a non rinse sanitiser is required.

Sanidex 80

When activated with Phosphoric, Citric or Hydrochloric acid Sanidex 80 produces Chlorine Dioxide which is a highly effective broad spectrum sanitiser. Kills a wide range of microorganisms. Can be used in drinking water. Dispense through a Cleantec Chlorine Dioxide Dosing System.

Virukill

Virukill represents a revolutionary approach to animal hygiene that has advanced the art of disinfection into a new era. It is approved by APVMA for use on all hard surfaces in poultry houses. Virukill is an antiviricidal and antibacterial agent.

Glutaplus

Broad spectrum glutaraldehyde and quaternary ammonium based sanitiser formulated for sanitising animal pens, sheds and farm equipment.

Formusol 400

Formaldehyde solution with an active constituent of 400 G/L formaldehyde. Used to control viruses in the poultry industry. Used to treat eggs, hatcheries and poultry sheds as a broad spectrum biocide. When used in gaseous form it should only be used by persons qualified or trained in its use.

Biodyne

Low foaming iodine sanitiser which kills bacteria quickly. Particularly effective where water quality is poor. Can be used in foot baths and on vehicles and equipment.

Egg Machine washing

Reserve

Formulated with a blend of alkaline, organic and inorganic sequestrants for hard water and scale control. Reserve is an effective liquid cleaner that can be dispensed through a dosing pump into an egg washer or a crate washer.

Eggcellent

Powdered egg washing detergent formulated for automatic egg washing equipment. Contains a dual halogen system for highly soiled conditions and low foam surfactant technology to prevent foaming caused by leaking albumen.

Dairy Chlor

Dairy Chlor is concentrated liquid sodium hypochlorite (chlorine). Highly effective sanitiser. Can be used to sanitise drinking water. Dispense into drinking water via a Cleantec Sodium Hypochlorite Dispensing System.

Personal Hygiene

Dermasoft Scrubs

Mild hand wash approved for use in food processing premises.

Dermasoft Antibac

Antibacterial hand cleaner. Ideal for food processing premises. AUSTR 75220.

Dermasoft Sanitising Hand Gel

A waterless gel formulated to kill 99.9%(log 4 reduction) of the following organisms in 30 seconds upon application: E.coli, MRSA, Listeria monocytogenes and Salmonella typhimurium. AUSTR 61125

Dermasoft Luxury

Body wash and shampoo that gently cleanses the skin and hair.

Descaler

CB 93

A heavy duty blend of nitric and phosphoric acids formulated as a detergent to remove organic and inorganic scale from stainless steel surfaces in the food processing industry.
